## SUMMARY

*I'm an experienced Front End Engineer with a strong background in designing, developing, and maintaining advanced web applications. My expertise lies in frontend development, particularly with React.js, Next.js, HTML, CSS, and TypeScript, as well as in working with microservices architecture. I specialize in utilizing Next.js for server-side rendering and focus on enhancing security, improving UI/UX design, coordinating projects, testing, and implementing efficient deployment strategies.*

*I approach challenges as a proactive problem-solver, always striving to learn and grow both personally and professionally while contributing to my team's success. I'm passionate about leveraging cutting-edge technologies to meet business goals and bring visions to life.*

*Am currently improving my spoken English to ensure even more effective collaboration with international teams and customers.*
